PROFILE

Computer Engineering Technology graduate with hands-on experience in PCB design and validation, full-stack web development, software testing, and technical documentation. With knowledge and practical experience in electronics, programming, troubleshooting, and system development, with a focus on developing and validating reliable technical solutions. Adaptable and detail-oriented, with a strong interest in technology and innovation, seeking an opportunity to apply and further develop technical skills while contributing to a professional team.

WORK EXPERIENCE

GP Synergia Technologies Corp.

PEZA Drive cor, First Cavite Industrial Estate

Printed Circuit Board Designer Intern

Feb 2026 - Jun 2026

- Worked across the PCB design workflow, including bill of materials (BOM) review, schematic annotation and generation, component placement, layout and routing, DRC checks, and Gerber file generation for fabrication.
- Reviewed technical design data and documentation, verifying components, connections, and layout details for accuracy and consistency.
- Used Cadence Allegro Design Entry and PCB Layout to support multi-layer PCB design, layout development, design verification, and manufacturing preparation.

PROJECT EXPERIENCE

LTC4125 and LT1714 Test Card

Feb 2026 - Jun 2026

PCB Design and Validation | Cadence Allegro

- Validated the test card design by cross-checking the schematic PDF, Cadence Design Entry, actual board images, and debug notes, documenting identified discrepancies for senior engineer review and verification.
- Implemented verified schematic modifications based on debugging findings, updated component placement and routing in the PCB layout, and generated Gerber files.

Innovation of Digital Ordering and Management System for MSMEs

Sept 2024 - Mar 2026

Full-Stack Web Development | Django, Python, HTML, CSS, JavaScript, PostgreSQL, Render

- Developed and deployed a customizable web-based system for three MSME beneficiaries across different business sectors, designed to simplify order processing, improve transaction management, and reduce manual errors.
- Implemented interface and service customization, inventory management, POS, user management, transaction history, and report generation features to address the operational requirements of the beneficiaries.

Laboratory Equipment Borrowing System

Feb 2024 - Jun 2024

Full-Stack Web Development | Python, HTML, CSS, JavaScript, MySQL, PythonAnywhere

- Designed responsive interfaces for students and laboratory technicians, providing an accessible platform for managing equipment borrowing activities.
- Integrated functionalities for equipment inventory, requests, approvals, borrowing status tracking, and user management, ensuring accurate and organized transaction records.

EDUCATION

Technological University of the Philippines - Cavite

Sept 2022 - Aug 2026

Bachelor of Engineering Technology Major in Computer Engineering Technology

Cumulative GPA: 1.60 Cum Laude

SKILLS

Technical Skills: PCB Design, Front-End & Back-End Development, UI/UX Design, Software Testing, Quality Assurance, Debugging & Troubleshooting, Technical Documentation

Personal Skills: Attention to Detail, Organization, Adaptability, Collaboration, Continuous Learning
